

Good morning, thank you for keeping the pool clean the last few weeks, really appreciate it. What I do not appreciate, is that chemicals were added by the caretaker, while there were people in the pool. I personally experienced this twice now. These chemicals can cause physical damage. Surely there are more appropriate times to add the necessary chemicals? Did anybody else experience this? I also feel that the cameras by the pool are invading the privacy of people enjoying the pool, so I suggest that it be removed.

My daughter told me this coz when she came up she was looking gry, when I asked why, she told me that the chemical were added in the pool while they were swimming, I thought it was very odd

09:13

Yes, she was in the pool with me and aunty Phoebe

Please if i dont put chemicals in the water it turns green then you moan if i put chemicals in you moan give me a time frame and stop walking around and look for something to moan manna

09:20

The solution is simple Manna, put the chemicals in while people aren't swimming. This isn't rocket science.
